

ABI has immediate openings for individuals that meet the Application Programmer job description...see following. For more information about ABI, please visit our website at www.abico.com.

Application Programmer

The Application Programmer position is for a qualified individual that is responsible for development and maintenance of all areas of enterprise applications including client interfaces, mid-tier application services, web development, and database development. It requires an individual who works well independently and in a team environment. This position is involved in all aspects of software architecture, design, development, requirements gathering, documentation, and other business side skills. Specifically, this position is a programming team member participating in the ongoing development and support of ABI's flagship **ABI MasterMind®** application.

Experience and Education:

- B.S. degree in Management Information Systems(MIS), Computer Science, or equivalent.
- Strong Problem Solving Skills
- Experience with data set manipulation, i.e., SQL Server, MY SQL, , or Pervasive.SQL
- Excellent communication skills, written and verbal; ability to handle multiple projects simultaneously.
- Ability to acquire and master new and complex technical skills.

Experienced Desired:

- 2 years experience programming in Magic xpa/Unipaas
- 2 years experience developing business applications
- Database experience
- Experience with two or more of the following tools/technologies: HTML/Java Script, VB.NET, MS Visual Studio , Magic xpa/Unipaas, SQL, C#, C++, or equivalent.
- Administration and programming of Microsoft SQL Server

Advanced Business Integrators, Inc. (ABI) was founded in 1990 and is headquartered in Sacramento, CA.
